

Fanning the Flames of the Darwin Debate

Award-Winning Author Defends the Science of Intelligent Design

The debate between proponents of Darwinism and those of Intelligent Design has reached the status of a full-scale public battle. With stories of qualifying statements about evolution in public school textbooks and the recent 80th anniversary of the Scopes Monkey Trial in the news, questions about our origins will not be put to rest.

Following up his award-winning *Doubts about Darwin*, Thomas Woodward traces the continuing saga of the Intelligent Design movement in *Darwin Strikes Back*. Focusing on the emerging key players on both sides—Michael Behe, William Dembski, Kenneth Miller, Robert Pennock, and more—Woodward helps readers navigate the tangled maze of public debate, including anti-ID activism from Christians, and shows what might be coming next.

Thomas Woodward (Ph.D., University of South Florida) is a professor at Trinity College of Florida, where he teaches the history of science, communication, and systematic theology. He is founder and director of the C. S. Lewis Society and lectures in universities on scientific, apologetic, and religious topics. The author of the award-winning *Doubts about Darwin*, Woodward is an avid astronomer and has been published in *Christianity Today* and other periodicals. He lives in Dunedin, Florida.

Darwin Strikes Back: Defending the Science of Intelligent Design

by Thomas Woodward is available from Baker Books

ISBN: 0-8010-6563-1 / \$14.99 / 224 pages / paperback

Praise for Thomas Woodward's previous book, *Doubts about Darwin*:

"*Doubts about Darwin* is an exciting history lesson. While there are no truces in view, these fighters are working toward intellectual freedom. And their stories can inspire you as you face your school board, colleagues, or biology professors."

—**Charles Colson**, BreakPoint

"Woodward's rhetorical history of the Intelligent Design Movement comes at an opportune time, masterfully disentangling the scientific, philosophical, and cultural impulses that drive the movement."

—**William A. Dembski**, author of *No Free Lunch*

"A faithful and trenchant analysis of the critical role of rhetoric. To understand the public battle over evolution, you must read this book."

—**Michael J. Behe**, department of biology, Lehigh University

"A fascinating account of what could be the most important science drama of our times."

—**Ravi Zacharias**, international speaker, author

Christianity Today 2004 Book Award Winner
